## **A. COMMENTS**

In the Office Action mailed January 11, 2005, the Examiner rejected Claims 1-34. In particular, the Examiner rejected Claims 1, 3-5, 7-8, 10-13, 15-20, and 24-32 under 35 U.S.C. § 102(e) as being anticipated by U.S. Publication No. US 2002/0026521 A1 to Sharfman et al. ("Sharfman"). The Examiner rejected Claims 2, 9, 14, and 21-23 under 35 U.S.C. § 103(a) as being unpatentable over Sharfman in view of "The Lharc/LHA Archiver" by Mille Babic ("Babic"). The Examiner further rejected Claim 6 under 35 U.S.C. § 103(a) as being unpatentable over Sharfman in view of U.S. Patent No. 6,668,244 to Rourke et al. ("Rourke"). The Examiner further rejected Claims 33 and 34 under 35 U.S.C. § 103(a) as being unpatentable over Sharfman in view of "Petite Win32 Executable Compressor" version 2.2 by Luck ("Luck").

## **B. COMMENTS REGARDING 35 U.S.C. § 102(e) PRIOR ART REJECTIONS**

The Examiner rejected Claims 1, 3-5, 7-8, 10-13, 15-20, and 24-32 under 35 U.S.C. § 102(e) as being anticipated by Sharfman. As discussed below, Applicant respectfully disagrees with the Examiner's rejection and respectfully traverses this rejection and the Examiner's characterization of the cited reference.

### **1. Independent Claim 1**

With respect to independent Claim 1, a method is recited for creating, in response to only a single action by a user, a self-extracting file. The method comprises, among other things, receiving, from a user, an input file to be used in creating a self-extracting file and without further action by the user, creating a self-extracting file using the input file.

In general, Sharfman appears to disclose a system and method for managing and distributing a multi-media presentation from a single central location. (Abstract.) In particular, Sharfman discloses collecting information from the user for creating a packaged presentation. (Figs. 8-13.) Such information includes collecting from the user either the user audio and presentation data, compression preferences, and new file name information. Sharfman requires

Appl No. : 09/818,134  
 Filed : March 27, 2001

constant interaction with the user and does not disclose "*without further action by the user, creating a self-extracting file using the input file.*"

Thus, Applicant respectfully submits that Sharfman fails to disclose the claimed subject matter of Claim 1, including each element of Claim 1, and Applicant respectfully requests that the rejection of Claim 1 be withdrawn.

## 2. Independent Claim 3

With respect to independent Claim 3, a method is recited for creating, in response to a single action, a self-extracting file from an associated input file. The method comprises, among other things, in response to only a single action, creating a self-extracting file.

As set forth above, Sharfman discloses receiving user input to determine the compression method and the clicking on a preview button. (Figs. 11 and 12, Nos. 365 and 367; Page 7, Section 90 ("The author makes their selection by clicking on one of two windows 365 and 367. Clicking on the preview button causes the processor 24 to carry out the . . . processes. . .").) Thus, Sharfman does not disclose "in response to only a single action, creating a self-extracting file."

Thus, Applicant respectfully submits that Sharfman fails to disclose the claimed subject matter of Claim 3, including each element of Claim 3, and Applicant respectfully requests that the rejection of Claim 3 be withdrawn.

## 3. Dependent Claims 4-5 and 7-8

Claims 4-5 and 7-8, which depend from independent Claim 3 and include all the limitations of Claim 3, are believed to be patentable for the same reasons stated above with respect to Claim 3 and because of the additional limitations set forth therein. Since Sharfman fails to disclose every element of Claims 4-5 and 7-8, Applicant respectfully requests that the rejection of Claims 4-5 and 7-8 be withdrawn.
